Summary

B.tech Computer Science student at AIET, Bhubaneswar, specializing in Full-Stack Development. Adept at designing Backend Systems and RESTful APIs using Python, paired with growing expertise in modern Frontend Technologies including React.js and Node.js to engineer practical, user-centric Software Solutions.

Technical Skills

- **Programming Languages:** Python, Java, SQL HTML, CSS, JavaScript, C
- **Core CS Concepts:** Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks, Basic CyberSecurity concepts
- **Developer Tools & Practices:** GitHub (Version Control), Postman (Algorithmic Problem Solving)
- **Full-Stack Frameworks & Tools:** TCP socket, REST APIs, React.js, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB, SQLite, Supabase

Projects

Personal Portfolio Website *January 2026*
HTML5, CSS3, JavaScript, Responsive Design

- Developed a responsive personal portfolio website to showcase technical projects, skills, and professional recommendations.
- Designed a clean, accessible user interface that features modular sections for about me, skills, and project details.

Neighborhood Community Chat Application *March – July 2026*
Python, FastAPI, REST APIs, TCP Sockets, PostgreSQL, SQLite, Docker

- Engineered a full-stack community communication platform utilizing low-level TCP Sockets for real-time data exchange and a Python FastAPI backend for RESTful routing.
- Implemented reliable data persistence, user session management, and efficient query routing by integrating PostgreSQL and SQLite relational databases, with deployment containerized via Docker.

Standalone Interactive Web Games *December 2025*
JavaScript (ES6+), HTML5, CSS3, DOM Manipulation

- Developed interactive web mini-applications—including an RGB color guessing engine and a precision reaction timer—using core vanilla JavaScript (ES6+).
- Programmed complex game logic, advanced DOM manipulation, and responsive UI layouts to optimize client-side performance and user engagement.
- Used core frontend state management and event listeners to ensure seamless cross-device compatibility and smooth interactivity.

Interactive Task Dashboard *2026*
React.js, JavaScript, HTML5, CSS3

- Built a responsive single-page task management dashboard in React to execute and manage modular interactive workflows.
- Applied component-based architecture and React state management to process dynamic client-side events and multi-tasking states seamlessly.
- Designed clean, intuitive UI/UX interfaces using CSS3 and HTML5, ensuring high component reusability and fast rendering performance.

Java KYC Verification Portal *August 2026*
Java, JDBC, MySQL, Object-Oriented Programming

- Developed core backend validation logic and structural workflows for a secure user verification system utilizing enterprise-grade Java.
- Integrated the application backend with a MySQL relational database via JDBC to execute secure database connections, data queries, and persistence operations.

Certifications

- **Introduction to Generative AI** – Google Cloud *September 2026*
- **Getting Started with Git and GitHub** – IBM *May 2026*
- **Certificate of Completion — Node.js** – Unstop *May 2026*
- **Computer Networks and Network Security** – IBM *April 2025*

Education

Aryan Institute of Engineering and Technology (AIET) Odisha, India
Bachelor of Technology in Computer Science and Engineering Expected 2027
