As a B.Tech student specializing in Computer Science and Engineering at AIET, Bhubaneswar, I am actively building a strong foundation in core engineering principles. My academic journey is complemented by a keen interest in emerging technologies. I am eager to apply my developing technical skills and problem-solving abilities to real-world challenges within the tech industry. My goal is to contribute effectively to innovative projects and gain practical experience in a dynamic professional environment.

Projects

Neighborhood Helpboard | (TCP client-server app)

- TCP client-server app for local neighborhood communication.
- Modular Python codebase.
- LAN accessibility.

Integrated secure onboarding workflows and deployed live instances on Render

Portfolio Site | **Responsive React + Vite portfolio**

- Responsive React + Vite portfolio with interactive skills and project showcase.
- Published via GitHub Pages.
- Polished UI/UX grids and charts.

Elearn Project | **E-learning platform**

- E-learning platform with structured modules and guided explanations.
- Focused on clarity of front-end file/folder organization.
- Focused on accessibility and guided explanations for learners.

Flight Management System | **Console-based app**

Console-based app with passenger registration, booking, search, and cancellations using SQLite.

Hotel Management System | **Automated room booking system**

Automated room booking, billing, and availability tracking.

Train Details Retrieval | **Database search app**

Fast database search and display of train information.

Education

Bachelor of Technology in Computer Science and Engineering | **Aryan Institute of Engineering and Technology Pursuing a B.Tech in**

- Computer Science and Engineering.
- CGPA: 8.5
- Strong foundation in core computer science principles and engineering practices.
- Preparing for advanced technical roles.

Certifications

- **Introduction to Web Development with HTML, CSS, JavaScript**
- **Getting Started with Git and GitHub**
- **Operating Systems: Overview, Administration, and Security**
- **Computer Networks and Network Security**

Experience

Team Lead, Frontend Developer, Backend Developer, Prompt Engineer | **Hackathons**

- Took on roles as Team Lead, Frontend Developer (React + Vite), Backend Developer (Python + SQLite), and Prompt Engineer for AIdriven demos.
- Led teams in multiple hackathons, coordinating planning and delivery under strict deadlines.
